1. Newly submitted claims 17 and 18 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The inventions recited in claims 17 and 18 are directed to a recording medium having track for recording data related to error correction, restore data lost and data size whereas the inventions recited in claims 1-16 are directed a recording medium and method/apparatus for recording/reproducing data on/from the recording medium particular wobbled or modulated track provided on a first and second layers of the recording medium. Accordingly, the inventions recited in claims 17 and 18 and the invention recited in claims 1-16 are distinct from each other and also unrelated as they are not disclosed as capable of use together and have different modes of operation, different functions, and different effects (see MPEP § 806.04 and MPEP § 808.01).

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 17 and 18 are withdrawn from consideration as being directed to a non-elected invention without traverse. See 37 CFR 1.142(b) and MPEP § 821.03.

The application has been amended as follows:

IN THE CLAIMS:

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: Claims 1, 2, 4-9 and 11-16 are allowed over the prior art of record because the prior art of record, considered in combination or individually, fails to suggest or fairly teach a recording medium, a recording method and apparatus including a combination of all limitations as particularly recited in each of claims 1, 6-8, 11 and 13-16. Claims 2, 4, 5, 9, and 12 are allowed with their respective parent claim.
